

Maximiliano Raúl Malvicino

JR .NET Fullstack Developer

Hi! I'm Max, and I'm passionate about acoustics and programming. I graduated from the Technical Degree in Programming at UTN and I am currently studying Sound Engineering at Untref. I have experience developing .NET systems with layered client-server architecture, using Razor MVC Views with Bootstrap on the frontend, and Entity Framework with SQL Server on the backend.

< Skills />

Frequent professional use

Languages: C#
Frameworks: .NET 10
Data access: Entity Framework
Frontend: Razor | Bootstrap
Databases: Microsoft SQL Server
Version control: Git

Complementary professional use

Languages: VB .NET | JavaScript
Frameworks: .NET Framework | WinForms
Data access: ADO.NET
Databases: MySQL
Automation: GitHub Actions

Research and academic work

Python | C++ | LaTeX

Currently learning

Angular | TypeScript

Freelance Projects

Membriana
Freelance SaaS product for managing memberships, tracking members, and administering affiliate payments.
https://github.com/mrmalvicino/membriana

DeCauciones
Static website delivered as a one-off freelance engagement to quote rental surety insurance and manage prospective customer inquiries. It includes online calculations, validated forms, responsive commercial content, and accessibility improvements.

Permanent Employments

Junior Software Developer
Halley Accurate Solutions
August 2025 - November 2026
Development and maintenance of .NET business applications for service stations and retailers.

- Joined as Junior 1 and earned an internal promotion to Junior 2, taking on greater autonomy and responsibility.
- Led and independently implemented the redesign and refactoring of the point-of-sale system, modularizing a complex WinForms form into reusable components.
- Centralized SAP Crystal Reports invocation and implemented reusable components for execution, parameterization, and sorting.
- Optimized transactional stock and traceability processes on MySQL; reduced queries from 66 to 37 in one measured workflow.
- Developed supply management for purchase, sale, and return operations using stored procedures and concurrency control.
- Refactored error handling by migrating 637 calls across approximately 250 files to a centralized API.

Technologies: VB .NET | C# | Microsoft .NET | WinForms | MySQL | SAP Crystal Reports

Teaching Assistant for Programming 2
Universidad Tecnológica Nacional
August 2024 - December 2025
Assistance to students in classes and forums, development of exercises on Object Oriented Programming in C++.

Teaching Assistant for Physics 1
Universidad Nacional de Tres de Febrero
August 2019 - July 2023
Design and resolution of exercises, preparation and correction of exams, experimental demonstrations with Python.

English Teacher
Biblioteca Popular Leonardo Favio
March 2014 - December 2017
English courses planning, private tutoring for secondary school students.
